BACKGROUND:

- An international group are collaborating to produce 'A Guidebook to Veterinary Clinical Skills Laboratories', with support from the Higher Education Academy, UK

AIM:

- Provide guidance on the key factors relating to successful design, implementation, running and sustainability of a Clinical Skills Laboratory (CSL)
- Information is also relevant to anyone involved in teaching practical and clinical skills i.e. from the anatomy lab to the clinic

CHAPTERS ON:

- Which skills should and can be taught
- Where to set up or build your CSL
- What equipment is available to develop or make the skills stations
- How to promote learning e.g. supporting resources
- Approaches to teaching and staff training
- Curriculum integration
- Assessment of clinical skills
- Management of a CSL (day to day running, financial planning, sustainability, etc.)
- Extras: peer-assisted learning, contextualised simulation, educational research in a CSL, references, useful resources and examples of learning materials

COMING SOON: The booklet will be launched shortly after VetEd 2014 & will be available in print and online under a creative commons licence
